

Children's Dentistry & Orthodontics is looking for a dedicated, energetic, full-time associate general dentist or pediatric dentist, and an orthodontist. We have offices that span the Central Valley (Bakersfield, Visalia, Fresno, Madera and Merced). Our ideal associate is someone who is kind, patient, and understanding to patients, parents, and staff. Our dental group fosters an environment of unity and teamwork, while allowing you the autonomy necessary to bolster your skills as a dentist working with children.

We are fortunate to have a great reputation within the dental and medical community. We are a locally owned, not a corporate chain, children's dental group. Our offices include a surgery center where we treat patients who are unable to cooperate for treatment in the office. If interested, the candidate may practice both in an office and the surgery center. We accept fee for service and Medicaid dental insurances, no capitation plans. Our schedule is thoughtfully organized in a way that allows the practitioner to be productive and efficient but not overworked. Our goal is to provide our patients with the best dental care possible. We believe that if you take care of the patient the financial benefits will take care of themselves, so there is absolutely no pressure for the doctor to "produce". Doctor compensation is a daily minimum guarantee or percentage of production, whichever is greater. Our average doctor earns \$1,500 / day.

The area is within driving distance to many notable California sites including **Sequoia and Yosemite National Parks, the Pacific Ocean, Disneyland, the San Francisco Bay Area, and Los Angeles.** This is a great place to raise a family with wonderful schools, affordable cost of living, parks, lakes, outdoor and community activities.

Please email us at jkunkeldds@calkids.com if interested.
